## CREATING AN OFFICE

With many of us working from home nowadays, you might need a space to call your own.

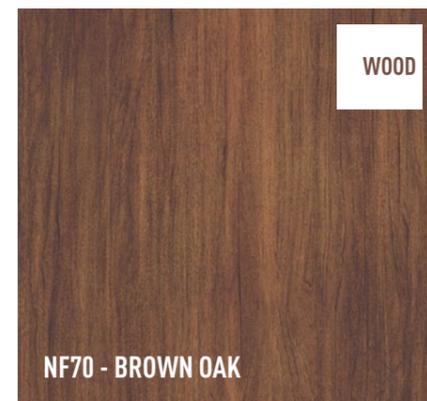

It's important to get the image right for your virtual meetings; brick or wood effects create a stylish and professional background, just like you're in the office.

Choose rustic or modern wood textures and colours for a corporate feel, softened with muted neutral references and feels, using one of the solid colour finishes.

Your office is a place to think and to concentrate, so steer clear of anything too vibrant – a blank canvas will allow your mind to roam free.
